

KLEEN & DRI™

PRE-MOISTENED TEAT WIPES

SIMPLIFIED TEAT PREPARATION

Udder preparation procedure

1. Remove loose dirt and residual bedding
2. Strip three streams from each teat
3. Clean each teat with circular motions
4. Flip towel and clean the teat end
5. Attach the milking unit

Kleen & Dri are pre-moistened, highly resistant towels for pre-milking teat preparation in one easy step. This convenient, economical solution saves time. These completely biodegradable towels are effective in only a few seconds and ensure better hygiene of teats and milker hands. Moreover, they gently stimulate the udder. No other pre-milking preparation is more effective and convenient than Kleen & Dri towels.

Pre-moistened towels for teat preparation in one step

- **All-in-one** - Replaces 3 preparation steps: pre-dipping, cleaning and drying of teats.
- **Time-saving** - Reduces preparation time, no need to wipe teats dry, saves time.
- **Rapidly dry** - Allows to attach the liners to dry teats that are protected during milking.
- **For best results** - Remove dirt, forestrip, clean with one side, flip towel and clean the teat end with the other side, then attach.
- **Convenient & safe** - Very good handling, keeps milker hands clean between cows.
- **Ecological & gentle** - Biodegradable towel, non-irritant.
